

CONTENTS

	page	IX
Foreword	“	1
N. ROBOTTI – The birth of “h”	“	1
H. KRAGH – Atomic structure and the crisis in quantum theory, 1910 - 1924	“	19
F. GUERRA – h and \hbar in the formulation of quantum mechanics and quantum field theory	“	37
L. M. BROWN – Settling accounts with h —how Compton scattering led to QED	“	45
H. RECHENBERG – h in molecules and solids, especially the quantum-mechanical tunnel effect	“	75
A. BARONE – The Josephson effect—encounters in macroscopic quantum phenomena	“	95
V. KOSE – Planck’s in metrology	“	115
M. INGUSCIO, C. FORT and M. ARTONI – Planck’s constant h and Bose-Einstein condensation in dilute atomic gases	“	131
B. BERTOTTI – Is h an absolute constant?	“	151
D. I. OLIVE – The quantisation of charges	“	173
W. THIRRING – $\hbar \rightarrow 0$	“	185
J. UFFINK – On the physical content of Heisenberg’s uncertainty relations	“	191
J.-M. LÉVY-LEBLOND – The meanings of Planck’s constant	“	211
